Kear, J. [=Kear, Janet]

Kear, Janet (1933–2004; England)

Ornithologist. BSc, Zoology, King's College, London (1956). PhD, Cambridge (1959). Wildfowl and Wetlands Trust, Slimbridge: Research Scientist (1959–93). BTO: Council (1983–1986). RSPB: Research Advisory Committee; Council (1977–1983; 1995–?). BOU: Council (1980–1988), Vice-President (1989–1991), first woman President (1991–1995) of the British Ornithologists' Union. Editor: *Ibis* (1980–1988); *Wildfowl* (1989–?). Editorial Board: *International Zoo Yearbook* (1974–?); Chairman (1980–1988). Committee Member, International Ornithological Congress (1982–1998), and Vice-President for its 1998 Congress in Durban. Awards: Order of the British Empire (1993); Union Medal of the BOU (1998); American Ornithologists' Union: Corresponding Fellow (1983–); Liverpool John Moores University: Honorary Doctorate (and title Professor) (1990). The BOU redesigned its Union Medal in 2019 and renamed it 'Janet Kear Union Medal' in her honour.

Kelaart, Edward Frederick (1819–1860; Holland/Germany)

Surgeon in the British Army in England, Gibraltar, and Ceylon (=Sri Lanka). Author of several species-group mammal names, and to a lesser extent also of other vertebrate names. His main taxonomic contribution however was the description of 16 species of *Turbellaria*, 22 species of *Actiniaria* and 63 species of *Nudibranchia*. Drawings of his specimens are deposited in the Linnean Society of London; the Hancock Museum, Newcastle-on-Tyne; and The Natural History Museum, London. Kelaart died at sea en route to England.

Kirkpatrick, William (1754–1812; England)

Officer sent to Nepal by Lord Cornwallis in 1793 to try and mediate between the Chinese and the Gurkhas (who were in control of Nepal at the time). This was in the aftermath of

the Chinese intervention following the Gurkha invasion of Tibet. Spent only seven weeks in Nepal. His book is one of the two earliest accounts of Nepal in English. Became Resident in Hyderabad (Deccan) 1793–1798.

Kloss, Cecil Boden (1877–1949; England)

Naturalist. In the early 1900s accompanied the American naturalist William Louis Abbott in exploring the Andaman and Nicobar Islands. In 1908 Kloss joined the staff at the Museum of Kuala Lumpur where he worked under Herbert Christopher Robinson and travelled in the region collecting specimens, especially of birds and mammals. Took over the directorship of the Raffles Museum from Major Moulton in 1923 [–1932]. By the time of retirement from Singapore in 1932, had become the foremost systematist on mammals and birds of Southeast Asia, with a long series of papers to his credit. He was an indefatigable mountaineer. He described nearly a hundred new species or subspecies of birds collected during his travels.

Koelz, W. [=Koelz, Walter Norman]

Koelz, Walter [=Koelz, Walter Norman]

Koelz, Walter N. [=Koelz, Walter Norman]

Koelz, Walter Norman (1895–1981; USA)

Koelz was born in Waterloo, Michigan on September 11, 1895. He received the degree of Doctor of Philosophy from the University of Michigan in 1920. His area of specialization was zoology, not the background one would expect for a collector of oriental art, but it was his background in biology which first took him to Asia. Dr. Koelz had already done some exporing with the 1925 McMillan Expedition to the American arctic, as well as comprehensive studies on whitefishes while working for The University of Michigan, the United States Bureau if Fisheries, and the state-supported Institute for Fisheries Research, when he was offered a post with the Himalayan Research Institute of the Roerich Museum. He accepted and arrived in Naggar, Kulu, in May 1930, to begin botanical explorations. Dr. Koelz left the Roerich post and returned to Michigan in 1932, but he had developed a strong interest in Tibetan culture which led to his appointment as Research Fellow on the Charles L. Freer Fund in September of 1932. During the summer of 1933 he returned to Indian Tibet to collect material for the University of Michigan Museum of Anthropology. In 1936 Dr. Koelz travelled once more to India, this time as a plant explorer for the U.S. Department of Agriculture. In 1939 he began a seven-year exploration through Persia, followed by more trips to India, Nepal and Assam. His Persian Diary, 1939–1941 has been published by The Museum of Anthropology. In 1956 Dr. Koelz was awarded the Meyer Memorial Award for outstanding contributions to the world of Agriculture. His seed collections are credited with saving several agricultural species in this country.

Kurhade, Sudhakar [=Kurhade, Sudhakar M.]

Kurhade, Sudhakar M. (1960–; India)

MSc, Zoology (1983). PhD, Studies on parasitic Hymenoptera from Maharashtra with special reference to Family Braconidae (1992). Entomologist, Zoologist, and Ornithologist. Teacher. Zoology Lecturer (1983–1996), Reader (1997–2006), Associate Professor (2006–2016), Professor (2016–2020) at New Arts, Commerce and Science College, Shevgaon, District Ahmednagar, Maharashtra). Member, Board of Studies in Zoology, Savitribai Phule Pune University, Pune (2017–2020). Honorary Wildlife Warden, Ahmednagar District, Maharashtra (2000–). Dr. Babasaheb Ambedkar Fellowship Award (2000). Fellow, Indian Association of Aquatic Biologists, Hyderabad (2005). Member, Senior Citizens Committee Of Maharashtra Pollution Control Board, Ahmednagar (2006-2009). Chairperson, 24th Maharashtra Pakshi Mitra Sammelan, North Maharashtra University, Jalgaon (2010). Chairperson, Second North Maharashtra Pakshimitra Sammelan, Baripada, Taluk Sakri, District Dhule (2018). Projects: Status and biodiversity of avifauna in Jaikwadi Water Reservoir, Maharashtra (2007-2009); Status and biodiversity of avifauna in Harischandragad Kalsubai area, Taluk Akola, District Ahmednagar, Maharashtra (2007-2009); Co-investigator: Anatidae of Nandur Madhmeshwar Water Reservoir, Nashik (2013-2015); Nesting ecology of the Near Threatened Painted Stork *Mycteria leucocephala* at Baradgaon Sudrik, Taluk Karjat, District Ahmednagar, Maharashtra (2015-2017). Has described several new species of Hymenoptera from Maharashtra, India. Resource person/expert for orientation and refresher courses for college and university teachers. Active participant in citizen science projects, prolific author of articles and papers.

LaPersonne, V. S. [=LaPersonne, Vivian Stanley]

LaPersonne, Vivian Stanley (1897–1938?; England)
Dutch ancestry. Ornithologist, collector. Assistant Curator, Bombay Natural History Society (fl. 1923–?). Author of several notes on birds. Collected for Col. R. Meinertzhagen in Ladakh (1925); Sir Percy Cox and Major R. E. Cheesman in the Middle East; on the Vernay Eastern Ghats survey. Exceptionally good 'skinner'. Moved to Singapore after India's Independence.

Latham, John (1740–1837; England)

Physician, naturalist and author. Studied anatomy under Hunter, and practised medicine for many years Dartford (Kent). He retired with considerable means in 1796, receiving his M.D. degree at Erlangen (Germany). *General Synopsis of Birds*, Latham's first ornithological work, contained 106 illustrations by the author and described many new species which he had discovered in various museums and collections. In this work, like Buffon (1707–1788), he did not attach importance to the names of the species which he described. Later, Latham realized that only the use of the Linnean binomial system would give him the honour of originating the species' scientific names. Thus, he published, in 1790, the *Index Ornithologicus* where he specified a binomial name for each of the species which he had previously described. Unfortunately, it was too late, as Johann Friedrich Gmelin (1748–1804) had already published his own version of Linnaeus' *Systema Naturae* in which he gave scientific names to Latham's species considering the rules of nomenclature; thus, Gmelin has priority. Latham maintained a regular correspondence with Thomas Pennant, Joseph Banks, Ashton Lever and others. He was elected to the Royal Society in 1775 and took part in the creation of the Linnean Society. Examined specimens of Australian birds, which reached England in the last twenty years of the 18th century and was responsible for naming many of them.

Leach, William Elford (1790–1836; England)

Physician, zoologist and marine biologist. Principally known by his works on entomology and crustaceans. He possessed a private fortune, so when he obtained the post of Assistant Zoologist (1813) at the British Museum and found the national collection in a most disgraceful state of decay and neglect, he set himself the task of making the British collections amongst the finest in the world. In 1821 he went to Italy and died there of cholera in August 1836.

Lear, Edward (1812–1888; England)

Artist, illustrator, and writer known for his nonsense verse and his limericks, a form that he popularized. The family came to grief financially, owing to the imprisonment and bankruptcy of his father, Jeremiah Lear, a London stockbroker. By 1827 the family had dispersed, with young Lear remaining with his sister Ann (21 years his senior), who brought him up. In June 1830 Lear was give permission to start drawings of the parrots in the Gardens of the Zoological Society in Regent Park, in the same year he commenced publication of the *Illustrations of the Family of Psittacidae, or Parrots*. His paintings were well received, and he was favourably compared with Audubon. John Gould purchased the reaming stock of the Illustrations, and in the same year Gould and Lear toured Europe. Visiting, among other places, the gardens and museums of Rotterdam, Berne, and Berlin. Both men came to an agreement and Lear started to work for Gould, Lear did the backgrounds of Elizabeth Gould paintings of the book A century of birds from the Himalayas (1832), and to the Birds of Europe (1832-1837) and contributed many plates to the Monograph of the Ramphastidae (1834). The plates in Prideaux John Selby's books on Pigeons (1835) and Parrots (1836) and in *The Naturalist's Library* from William Jardine were made by Lear. Between 1832 and 1836 Lear worked at the book published by John Edward Gray—*Gleanings from the Menagerie and Aviary at Knowsley Hall* (1846). It was during this period that Lear achieved fame for his Book of Nonsense (1846). Other illustrations appeared in Thomas Campbell Eyton's *Monograph on the Anatidae* (1838) and in Jardin and Selby's *Illustrations of Ornithology*, vol. 4 (1843). He did not keep good health; from the age of seven until the time of his death he suffered frequent epileptic seizures, as well as from bronchitis, asthma, and in later life, partial blindness.

Legge, W. V. [=Legge, Colonel William Vincent]

Legge, W. Vincent [=Legge, Colonel William Vincent]

Legge, Colonel William Vincent (1841–1918; Australia)

Tasmanian soldier and ornithologist. Educated at Bath, Paris and Germany. Commissioned in the Royal Artillery 1862; stationed at Dover 1862–1867; served with the imperial troops in Melbourne 1867–1868; Ceylon 1869–1877 where, as secretary of the Royal Asiatic Society he reorganised the run-down museum at Colombo and made a large collection of birds; instructor in gunnery, Portsmouth 1877–1883, retiring as lieutenant-colonel; Commandant of the Tasmanian military forces 1883–1890, 1898–1904; retired to 'Cullenswood'. Founder, (Royal) Australasian Ornithologists' Union 1901 and first President 1901–1903; President, biological section, Australasian Association for the Advancement of Science Congress, Dunedin, 1904; Colonial Member, British Ornithologists' Union; Honorary Fellow, American Ornithologists' Union. The bird skins he collected in Ceylon were presented to the Hobart Museum in 1902.

Lesson, R. P. [=Lesson, René Primevère]

Lesson, René Primevère (1794–1849; France)
Surgeon and naturalist. Served in the French navy during the Napoleonic Wars; in 1811 was third surgeon on the frigate *Saal*, and in 1813 second surgeon on the *Regulus*. Served as surgeon on the round-the-world voyage of *La Coquille* (1822–1825), and was also responsible for collecting natural history specimens with fellow surgeon Prosper Garnot. The first naturalist to see live birds of paradise in the Moluccas and New Guinea. On returning to Paris spent seven years preparing the vertebrate zoological section of the official account of the expedition, *Voyage au tour du monde sur La Coquille* (1826−1839). During this time also produced *Manuel d'Ornithologie* (1828), *Traité*

d'Ornithologie (1831), *Centurie Zoologique* (1830–1832) and *Illustrations de Zoologie* (1832−1835). Also wrote several monographs on hummingbirds and one book on birds of paradise. His experience as a ship's surgeon resulted in his two-volume *Manuel d'Histoire Naturelle Médicale et de Pharmacologie* (1833), intended as a handbook for all naval surgeons. In 1832 was appointed pharmacist-in-chief of the French navy in Rochefort. Became professor a l'Ecole de Medicine Navale de Rocheforte, where he died.

Levaillant, François (1753–1824)

Intrepid Dutch/French traveller, pioneering naturalist, famous author and celebrity in his own lifetime. Born at Parimaribo, in Dutch Surinam, son of a well-to-do merchant of business originating from France. By 1763 Levaillant moved to France and spent time collecting natural history objects. Supported by the Dutch Government, Levaillant went on a trip to South Africa in 1779, returning to The Netherlands (1784) and moving to France in early 1785. The colourful accounts of his travels in southern Africa in the 1780s were published in 1790 and widely read in seven languages. His sumptuous bird books, published in a golden age of natural history book production, recorded for posterity his extensive bird collections. Yet he has often been dismissed as a flamboyant Gallic adventurer with a cavalier regard for the truth. Was opposed to the systematic nomenclature introduced by Linnaeus and only gave the new species he discovered French names. Other naturalists later assigned binomials to his discoveries. The potent mix of science and commerce is reflected in Levaillant's fascinating pursuit of knowledge of the animal kingdom and his active trade in specimens during the social and political upheavals of the early 18th century. His extensive collections can be found both at Leiden and Paris. However, he died in poverty.

Linnaeus, Carl (1707–1778; Sweden)

Also known after his ennoblement as Carl von Linné, wrote under the Latinized name *Carolus Linnaeus*. A Swedish botanist who laid the foundations for the modern scheme of taxonomy. Also considered one of the fathers of modern ecology. Ascended to the Chair of Medicine at Uppsala in 1741, soon exchanging it for the Chair of Botany. Continued to work on his classifications, extending them to the animal and mineral kingdoms. The latter strikes us as somewhat odd, but the theory of evolution was still a long time away, and indeed, the Lutheran Linnaeus would have been horrified by it. Linnaeus was only attempting a convenient way of categorizing the elements of the natural world. The Swedish King, Adolf Fredrik, ennobled Linnaeus in 1757, and after the Privy Council had confirmed the ennoblement Linnaeus took the surname von Linné, later often signing just Carl Linné. His father, born Nils Ingemarsson, had adopted the Latin surname Linnaeus as more appropriate for a clergyman on his matriculation at Lund University; the name deriving from the lime tree after which the family farm, Linnagård, took its name.

Lowther, E. H. N. [=Lowther, Ernest Herbert Newton]

Lowther, Ernest Herbert Newton (1890–1952; England)
Born in India, educated in England. Returned to India in 1911 and joined the East Indian Railway, retiring in 1945 as Divisional Superintendent at Lucknow. Passionate pioneer of bird photography in India, was once introduced to a gathering as 'a railwayman in his spare time'. Many of his pictures were taken from high above ground-level, sometimes between 18 and 24 m up, in circumstances

involving hard work and physical risk. The plains of India during the hot weather are not an ideal place in which to watch birds, but despite the heat Lowther carried out some very good work. In time, however, it affected his health and under doctor's orders he gave up his photography. Nevertheless, the urge was too strong, and very soon he was at work again, heat or no heat!

Lynes, H. [=Lynes, Rear Admiral Hubert]

Lynes, Rear Admiral Hubert (1874–1942)

Lynes entered the Royal Navy when 13 years old and had a distinguished career of thirty-two years in service. For his services he was awarded the Croix de Guerre and was made Commander of the Legion of Honor and of the Order of Leopold in 1918. He retired in 1922 as Rear Admiral. He became interested in ornithology at an early age. He served as Vice President of the British Ornithologists' Union in 1929 and was elected Corresponding Fellow of the A.O.U. in 1930, advancing to Honorary Fellow in 1941. Hugh Whistler named a crested lark in his honour—*Galerida cristata lynesi*.

MacDonald, Malcolm [=MacDonald, Malcolm John]

MacDonald, Malcolm John (1901–1981; England) Politician, diplomat and writer. His father became Prime Minister James Ramsay MacDonald. Malcolm Macdonald served on London County Council, 1927–1930, and became a Labour MP in 1929. Was made Parliamentary Under-Secretary in the Dominions Office in 1931, and was a cabinet minister from 1935 to 1940, when he held the offices of Secretary of State for Dominion Affairs and Secretary of State for the Colonies. Became Britain's High Commissioner to Canada in 1941, Governor-General of the Malayan Union of Singapore in 1946, and the United Kingdom Commissioner-General for South-East Asia in 1948. Was High Commissioner in India 1955–1960, Kenya's Governor and Commander-in-Chief 1963–1964, and High Commissioner 1964–1965. From 1967 to 1969 was the Special Representative of the British Government in Africa. Retired in 1969, but continued to hold various offices, including the Presidency of the Royal Commonwealth Society 1971–1981.

Magrath, H. A. F. [=Magrath, Henry Augustus Frederick]

Magrath, Lieutenant-Colonel Henry Augustus Frederick (1867–1940; India)
Wellington College, Berks. Indian Army, Frontier Force (1888–1919). Commandant 51st (1916–1918) and 54th Sikhs. Became interested in birds only in 1902, when he was a Recruiting Officer for Sikhs in Punjab. In Kohat (1904) he met C. H. T. Whitehead (56th Rifles F.F.), which led to a paper on the birds of that district.

Marshall, C. H. T. [=Marshall, Charles Henry Tilson]

Marshall, Charles Henry Tilson (1841–1927; England) British Army Officer and ornithologist in India. Published papers in *Ibis* with his brother George Frederick Leycester Marshall. He entered the Indian Army in October 1859 and was attached to the 35th Royal Sussex Regiment before joining the 3rd Sikhs, Punjab Frontier Force, with whom he served in the Umbeyla campaign of 1863–1864. Was later placed in charge of the Chamba State in the Himalaya during the minority of the late Raja, Sham Singh, during which time he published a paper on the birds of Chamba in Ibis. Was private secretary and confidential adviser to the young Nizam of Hyderabad. The name of the two Marshall brothers is commemorated in that of the Great Himalayan Barbet *Megalaima marshallorum* Swinhoe.

Marshall, Joe [=Marshall Jr., Joe Truesdell]

Marshall, Joe T. [=Marshall Jr., Joe Truesdell]

Marshall Jr., Joe Truesdell (1918–2015; USA)
Professor of Zoology and Curator of Birds at University of Arizona. Joined the U.S. Army in WWII and served as Parasitologist in Micronesia. Co-authored *Birds of Arizona* (1964). Interested in the use of bird vocalisations in taxonomy; and harpsichords, which latter he built himself.

Mathews, G. M. [=Mathews, Gregory Macalister]

Mathews, Gregory M. [=Mathews, Gregory Macalister]

Mathews, Gregory Macalister (1876–1949; Australia)
Australian ornithologist. Came under the influence of R. B. Sharpe at the British Museum in the early 1900s and thereafter endeavoured to produce an exhaustive work on Australian birds. Made an intensive study of the skins of Australian birds and the literature concerning them (collected 5,000 books, now in the National Library at Canberra, Australia), with Tom Iredale as his secretary 1911–1923. His collection of bird skins (30,000) was sold to Lord Rothschild and is now in the American Museum of Natural History, New York. Represented Australia at several International Ornithological Congresses. Fellow of: Royal Society of Edinburgh, Royal Australasian Ornithologists' Union (1939), American Ornithologists'

Union. Chairman, British Ornithologists' Club 1935–1938; President, Royal Australasian Ornithologists' Union 1946–1947.

Maxim Rodrigues K. (1997–; India)

Rodrigues, M. [=Maxim Rodrigues K.]
MSc, Marine Geology (2020). Interests: Ornithology, Herpetofauna, Odonates, Environmental Science, Geography, and Geology. Founder of Kasaragod Birders Club (2016), and *Piculet* (2018). Intern, SACON (2017); Project Assistant, Nature Conservation Foundation (2020–2021); Intern, Wildlife Institute of India (2021–2022). Coordinator, Young Birders Network, Kerala (XXXX–); Coordinator, Kasaragod Bird Atlas (2017–2018). Participated and coordinated several wildlife surveys in protected areas of the Western Ghats; Organised pelagic bird surveys; Participated in Kerala Bird Atlas and helped with its organising in several districts of Kerala; Established the Kidoor Bird Festival (XXXX). Awards: Award of Excellence for Nature Conservation, Indian Catholic Youth Movement (2016); Green Student Award, Friends of Nature (2017).

Mayr, E. [=Mayr, Ernst]

Mayr, Ernst (1904–2005; Germany)
Evolutionary biologist, taxonomist, tropical explorer, ornithologist, science historian and naturalist. Father of the biological species concept. Educated at Berlin, receiving his Ph.D. in 1926. In 1931 became a research associate at the American Museum of Natural History and played a vital role in procuring Walter Rothschild's fabulous collection of bird skins. Joined the faculty of Harvard University in 1953, where he also served as director of the Museum of Comparative Zoology 1961–1970, retiring in 1975 as emeritus professor of zoology. Recipient of a clutch of awards in his lifetime including the National Medal of Science, the Balzan Prize, the Sarton Medal of the History

of Science Society, the International Prize for Biology, the Loye and Alden Miller Research Award, the Lewis Thomas Prize for Writing about Science and the Crafood Prize in 1999. He was elected a Corresponding Member of the Royal Australasian Ornithologists' Union. After he became famous, he would spend hours providing detailed and encouraging comments on unsolicited manuscripts received from students. Most of the royalties from his books and the honoraria associated with the many prizes that he received were directed to support libraries and research.

McClure, H. E. [=McClure, Howe Elliott]

McClure, Howe Elliott (1910–1998; USA)
Ornithologist. Completed his Ph.D. in wildlife management in 1941 with studies in the ecology and management of the Mourning Dove. In 1938, his lifelong commitment to ornithological activities and bird banding began. Personally banded close to 1,00,000 individuals of 550 species, the latter possibly a world record. Joined the American Ornithologists' Union in 1942 and became a Fellow in 1990. In 1963 was involved in starting an epoch-making project for researching migratory birds in Asia with funding from the Southeast Asia Treaty Organization, called the Migratory Animal Pathological Survey (MAPS). It expanded over eight years to carry on banding work in 18 Asiatic countries. The MAPS programme banded a total of 11,65,288 individuals of 1,218 species, of which 5,601 individuals of 235 species were recovered.

Meinertzhagen, A. C. [=Meinertzhagen, Annie Constance]

Meinertzhagen, Annie Constance (*née* Jackson) (1889–1928; Scotland)

Ornithologist. Second wife of Col. Richard Meinertzhagen, with whom she travelled to Sikkim, Tibet, and the Himalayas (1925–1926) to collect and study birds. Her death, from a revolver bullet, is an unresolved mystery. Awards: British Ornithologists' Union: Honorary Lady Member (1915); American Ornithologists' Union: Corresponding Member (1919).

Meinertzhagen, R. [=Meinertzhagen, Colonel Richard]

Meinertzhagen, Colonel Richard (1878–1967; England) British Army. Ornithologist, big game hunter, writer, and spy. Served in India, Burma [now Myanmar], and Africa. A larger-than-life character, who, unfortunately, was proved to be a colossal fraud after his death, both, in his purported military accomplishments, and, in the shocking discovery that he stole museum specimens (including those of Hugh Whistler) and resubmitted them as his own. Donated a collection of *c*.600,000 bird lice (Mallophaga), largely collected and mounted on microscope slides by himself. This was at that time the most extensive, and probably still is the most valuable, collection of the kind in the world. Also bequeathed a collection of *c*.25,000 bird skins to the British Museum. Accused also of extra-judicial killings. Prolific diarist (it was later proved that he even falsified his diary entries) and author. BOU: Committee (1927–1930), Vice-president (1940–1943). BOC: Chairman (1953–1956). Royal Geographical Society: Council (1927–1930). Awards: DSO. CBE (1957). BOU: Godman-Salvin Medal.

Moorcroft, William (1767–1825; England)
Veterinarian. Civil Servant. Explorer. Was the first British verterinary surgeon. Helped found the British Veterinarian College. Assumed charge of the East India Company's stud farm (1808). Travelled to Tibet in search of better stock for the Company's stables, meandering to search for Lake Mansarovar and buy Pashmina wool. Had frequent unpleasant run-ins with the Company's bosses. Reached Bokhara where he found, not horses, but learnt that the Russians had preceded him by four years.

Mountaineer [=Wilson, Frederic]

Mountfort, G. [=Mountfort, Guy Reginald]

Mountfort, Guy Reginald (1905-2003; England)
British naturalist and conservationist. Co-founder of World Wildlife Fund (1961); led scientific expeditions to various countries: Bulgaria, Hungary, Spain, Jordan and Pakistan. In

1978, was awarded the prestigious WWF Gold Medal for his outstanding contribution to conservation. Was also made a Commander of the Order of the Golden Ark in the Netherlands and awarded the Order of the British Empire in 1970. The architect of WWF's international programme to save the tiger from extinction. In 1972 he conceived Operation Tiger which, the following year, teamed up with the Indian Government's Project Tiger to establish a series of tiger reserves across the country. Operation Tiger raised more than $1 million for conservation of the tiger.

Neelakantan, K. K. [=Neelakantan, Kavassery Kailasham]

Neelakantan, Kavassery Kailasham (1923–1992; India) Professor of English literature. Taught in various institutions and retired as the Head of the Department of English, University College, Trivandrum (Kerala). Discovered the largest Indian breeding colony of *Pelecanus philippinus* at Aredu in Andhra Pradesh (India) in 1947. Was the foremost authority on Kerala's birds and wrote copiously on them in Malayalam under the pseudonym 'Induchoodan'. His *Keralathile pakshikal* won the Kalyani Krishna Menon Prize (1960). Was Founder President of Kerala Natural History Society and Vice-President of Prakruti Samrakshna Samithi (Trivandrum). Served as a member of the Kerala Wildlife Board and of the Kerala State Committee of WWF-India. Editorial Board *Newsletter for Birdwatchers* (1961–1975). An artist, he illustrated his own books.

Nelson, J. B. [=Nelson, Joseph Bryan]

Nelson, J. Bryan [=Nelson, Joseph Bryan]

Nelson, Joseph Bryan (Bryan) (1932–2015; England) BSc, Zoology (1959). DPhil, Animal Behaviour/Ecology (1963). Academic career at Aberdeen University (1969–1985). Special interest: Seabird ecology and behaviour, especially Pelecaniformes. One of his proudest achievements was pressing the Australian government into making Christmas Island (an Australian territory in the Indian Ocean) into a National Park, largely to save an endangered bird, the Abbott's booby which nests only on the island. Awards: Fellow of the Royal Society of Edinburgh (1982); MBE (2006). Author of books and papers.

Newton, A. [=Newton, Alfred]

Newton, Alfred (1829–1907; England)
Zoologist. Born in Switzerland, moving to England with his family in 1848. From 1854 to 1865 studied ornithology in Lapland, Iceland, the West Indies and North America. In 1866 became the first professor of zoology and comparative anatomy at Cambridge. In 1900 received the Royal Medal of the Royal Society and the Gold Medal of the Linnaean Society. Edited *Ibis* 1865–1870.
